

Solidarity with Chile

Live discussion, 2019

During the dramatic civil unrests in all of Chile, we co-organize an event with la_cápsula to show our solidarity with the Chilean people. In Zurich, Dr. José Cáceres, assistant professor at UZH, introduces the political and social context of the protests. Member of Swiss National Council Fabian Molina participated and underlined the political responsibility of Switzerland. Live from Santiago we hear curator Montserrat Rojas and artist Seba Calfuqueo speak about their views of the situation and their experiences as active protesters.
